

# Oceans of NIGHT

## DOMAIN

*Domain* is the second CD release from progressive metal band, **Oceans of Night**. Mixed and engineered by Joey Vera (Fates Warning, Armored Saint, Engine) *Domain* features a refined focus on the staples of the **Oceans of Night** sound: soaring vocal melodies, evocative guitar solos, sophisticated rhythm structures, and dynamic song arrangements wrapped in a tapestry of percolating ambience. Epic and cutting edge, this is music that makes a bold and powerful statement.

Rising from the ashes of the eponymous solo band lead by musical mastermind Scott Moshier, from 1996 through 2004, **Oceans of Night** also features vocal powerhouse Scott Oliva and the drum mastery of the mysterious Alan Smithee. **Oceans of Night** released their crushing debut CD, *The Shadowheart Mirror*, in 2009.

Through the course of 6 CD's, multi-instrumentalist Scott Moshier has bridged the worlds of progressive metal, melodic hard rock and ambient sounds to create an experimental yet complimentary style of music that is at once as subtle as it is powerful, aggressive as it is dynamic and timeless as it is modern. Scott Oliva continues to perform in legendary NY Iron Maiden tribute band, Live After Death and The Nightmare Stage. He has also written, performed and recorded with Wind Wraith and Inner Strength. The Scott's had first worked together on Mr. Moshier's 4th CD release, *Deep Horizon*, in 2006.
