INFERNO expands upon the synthesis of heavy progressive rock and ambient textured soundscapes established on VIRTUALITY and delves further into the worlds of hauntingly melodic and dark evocative music. With a stronger emphasis on vocal arrangements, guitar-based dynamics and dramatic song structures, INFERNO makes a bold statement as the next step in artistic evolution... and fits all head sizes.

The range and diversity on INFERNO is showcased on pieces like the ominous soundscapes of "Descent", the somber tribal rhythms of "Dark Sun" and the melancholy "Exile", through the crushing groove and sonic bombast of "Inferno" and "Ghostland", the melodious "Left Behind" and ultimately crescendo's in an emotional aria on the grandiose epic "The World Fades to Gray".
